Professional Summary

Resourceful Associate Product Manager–in–training with 4 years in a lean-startup environment. As the "face of Cambliss Private Limited," I've bridged client visions and development delivery—eliciting requirements, shaping simple UX wireframes, defining MVP scopes, and coordinating end-to-end builds. Adept at balancing business priorities, managing timelines, and ensuring smooth handovers, I'm ready to step fully into APM or Product Analyst roles.

Experience

Cambliss Private Limited, Mumbai

Software Developer & Product Coordinator

June 2021 – Present

- Requirement Gathering: Led discovery calls with 10+ clients to map business goals into clear project scopes and user stories.

- MVP Definition: Prioritized features using lightweight frameworks (MoSCoW), ensuring rapid delivery of core functionality.

- Wireframing & UX Alignment: Sketched and validated simple UI/UX flows in collaboration with designers to boost user clarity.

- UI Development with React: Built and maintained reusable React components, managed state with hooks (useState, useEffect), and integrated REST APIs to deliver interactive interfaces.

- Cross-Functional Coordination: Orchestrated small-team sprints—planned tasks, tracked progress, and facilitated demos—achieving 95% on-time releases.

- Deployment Oversight: Managed deployments via GitHub to Hostinger, Vercel, and Firebase, ensuring zero critical post-launch issues.

- Project Closure & Feedback: Conducted post-mortems and collected user feedback to inform continuous improvements for future iterations.

Key Highlights:

- Reduced average delivery cycle by 30% through streamlined requirement processes.
